REJS – Technology, precision, development

For over 32 years, we have been developing a modern production infrastructure, including CNC machines, lasers, plastic forming equipment, powder coating lines, and galvanic processes.

We specialize in:

- production of furniture accessories (REJS brand),
- custom manufacturing (OEM projects),
- production of upholstery fittings.

A team of over 1,000 employees handles processes from design and prototyping to final assembly. Production is subject to strict quality control in compliance with ISO 9001:2015 and client specifications.

We conduct advanced R&D projects co-financed by EU funds – including work on modular drawer slides, magnetic systems, and heated furniture components. We operate a modern laboratory for material and functional testing.

REJS is a reliable supplier of precise, durable, and innovative solutions for the furniture and related industries.

EL2 BLACK, FINE STRUCTURE, SEMI-MATTE

554 RAL 9005 BLACK STRUCTURE MATTE

715 RAL 9005 FINE STRUCTURE SEMI-MATT

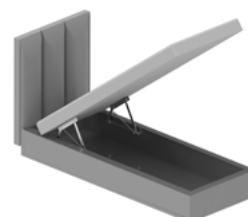

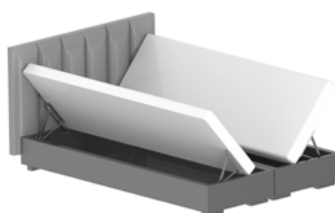

A modern lounge furniture system is showcased in a contemporary courtyard. The scene features a dark leather armchair with a white cushion and a black headrest, positioned on a light-colored woven rug. To the left, a white modular sofa is partially visible. The background includes a textured stone wall, a large potted plant, and a glass wall with vertical wooden slats. A wooden side table with a vintage-style radio sits on the right. The overall aesthetic is minimalist and sophisticated.

LOUNGE FURNITURE SYSTEMS

The mechanisms we offer are high-quality furniture lifters designed to facilitate the opening and closing of upper furniture components, such as those used in daybeds, sofas, sofa beds, armchairs, and beds. Depending on the type of furniture, these mechanisms vary in design and operating principle. Below, we present the main types of lifters available in our range, followed by detailed information on individual models in the subsequent sections.
